

Iskren Systems Solutions

Government Contracting Capability Statement

Software Development & Digital Transformation

Turning product ideas into reliable software.

1) COMPANY OVERVIEW

Iskren Systems Solutions helps agencies, startups, and companies design, build, test, and launch reliable digital products. We combine business analysis, software engineering, QA, and structured delivery to reduce risk and improve execution from discovery to launch.

2) CORE CAPABILITIES

- Custom Software Development
- MVP Development
- QA & Testing
- Business Analysis
- API Integrations
- Technical Documentation
- Digital Transformation Support
- Project-Based Delivery and Dedicated Teams

3) DIFFERENTIATORS

- Product thinking + business analysis + engineering in one delivery model
- QA built into every sprint, not added at the end
- Structured delivery process: Discovery, Planning, Development, QA, Launch
- Modern AI-assisted workflows to improve speed and quality
- NDA-friendly, scalable, and execution-focused
- Multidisciplinary team: BA, Tech Lead, Frontend, Backend, QA, DevOps, UX/UI, PM

4) RELEVANT EXPERIENCE

- Personnel Records Digitization**
Reduced processing time by over 60% by transforming manual processes into a centralized digital platform.
- Digital Library Platform**
Enabled scalable remote access to digital content for thousands of users with high availability.
- Police Operations Management**
Implemented a national-scale solution for critical information management, improving coordination and operational visibility.

5) INDUSTRIES SERVED

FinTech	SaaS
Healthcare & Clinics	Education
Logistics	Real Estate
Professional Services	E-commerce
